The main content area is titled 'Assignments' and contains the following text:

A patent or application for a patent is property and, as with any other property, it may be assigned from one person or entity to another. It may also be licenced for use by another person or entity and may be used as security for a mortgage. An application to register such a transaction should be made on Patents Form 21/77.

You should note the following:

- The form should be signed by or on behalf of the person or persons making the application to confirm that the rights, which are affected by the transaction, have been acquired and that any stamp duty has been paid.
- In the case of an assignment, the form should be signed by or on behalf of all the parties to the assignment, notably the assignor and assignee; while, in the case of a mortgage or the grant of a licence or security, it should be signed by the mortgagor or grantor. If the form has not been so signed, it should be accompanied by documentary evidence establishing the transaction.
