Subject: RE: OBSERVATIONS ON PATENT APPLICATION No.GB1217066.8

Thank you for contacting the IPO regarding the s.21 observations filed on 28/05/2021 in connection with [GB 1217066.8](#).

When the office receives observations from third parties, we upload a copy to our Online Patent Information and Document Inspection Service (IPSUM) so that they are available for members of the public to view. Depending on the file size and file type that observations are provided to us in, there may be a slight reduction in image quality when the files are uploaded to IPSUM. This reduction in image quality only relates to the publicly available IPSUM version of the documents. The observations provided to the examiner for consideration, and the copy send to the applicant, are the original observations and retain their original image quality.

The office does not interfere with or otherwise redact third party observations unless they contain libellous, obscene or defamatory material. I can confirm that your s.21 observations received on 28/05/2021 were not redacted by the office.
