Aside: These *Nunc Pro Tunc Assignments* are by an inventor called Hoechst, not a Hoechst company. A [useful article on NPT Assignments](#) describes [US Proceedings](#) which bear certain similarities to

- (1) fraudulently-swayed UK High Court and UK Patents Court proceedings relating to the UK part of what were once Hoechst's [global EP0155634 food & beverage-sweetener patents](#)¹, and to
- (2) fraudulently-swayed UK Patent Office & Patents Court proceedings and a falsified *Case Report* all relating to [California](#)-incorporated Santa Fe Int. Corp.'s (**renamed Santa Fe Int. Company in 1982**) global subsea oilpipe-laying patents².

¹ Background:

Nutrinova Nutrition Specialities & Food Ingredients GmbH (Nutrinova...GmbH) was "the registered proprietor" (UK), [according to its 25.Aug.1998 Exclusive Licence to Nutrinova UK Ltd.](#)

Nutrinova...GmbH had "been at all material times the proprietor", [according to a 26.Aug.1998 High Court Writ.](#)

All material times had to be *after* the initially-concealed and later falsely pleaded, redacted & misrepresented **contribution agreement** – i.e. after 28.Aug 1997. One material time which was never mentioned in any of the 1998–2002 proceedings was [THE transfer date - 1.Sept 1997.](#)

² Background:

Kuwait Petroleum Corp.(KPC), gave rise to national security concern in Congress & the US's largest prosecuted insider trading crime by agreeing to pay \$2.5bn (2 x value) for Santa Fe Int. Corp, **not its patents**, under a 1981 **Merger Agreement** which Delaware-incorporated KPC, **renamed Santa Fe Int. Corp. in 1982, did not complete until 1.Mar.1990.** Material dates covered up by the UK Patent Office were [1.Mar.1990](#) and 9 & 11.Nov.[1994](#). A material date covered up by the Court was [13.Jun.1989.](#)
